

To : **MHM Green Systems JLT**
P.O. Box No. 340096
Dubai, United Arab Emirates

Date : July 23, 2013

Subject : **Letter of Recommendation**

The purpose behind this project was to reduce our energy consumption and Carbon Footprint at Ski Dubai, Mall Of The Emirates. With the help of MHM's team and after installing their unique product Powerstar, a comparison of electricity usage before and after installation shows a significant savings of 9.7% which exceeded their guaranteed savings. Powerstar voltage optimization has shown that significant savings can be achieved without compromising our delicate and challenging operations. This is a fundamental step towards our efforts to minimize our Energy consumption and Carbon Footprint. I am happy to recommend Powerstar to anyone seeking similar objectives to ourselves.

Tom Scheffer
Operation Manager
Ski Dubai, MOE
